

LEONAL ROBIN

Dindigul, Tamil Nadu, India

+91 8248731433 | leonalrobinr10@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Junior Support Specialist-oriented Computer Science and Engineering graduate with strong analytical and problem-solving skills in application software and customer experience. Recognized as a National-level Hackathon Winner for innovative problem-solving, eager to learn and contribute to a dynamic support environment. Committed to delivering positive customer experiences and enhancing product knowledge.

SKILLS SUMMARY

Programming Languages: Python, JavaScript, TypeScript, SQL, HTML

Frameworks & Libraries: React.js, Node.js, Flask, Django

Tools & Technologies: MySQL, PostgreSQL, Git, Jira, Firebase, AWS, MongoDB, OpenCV, TensorFlow, IoT, Embedded Systems

EXPERIENCE

Flam | Front-End Engineer (R&D) Intern

Bangalore, karnataka, India

NextJs, TypeScript, TailwindCSS, GitHub | Aug 2025 -- Mar 2026

- Developed a Remotion-powered video editor with timeline-based sync for text, images, and video overlays, significantly enhancing user control and application functionality.
- Introduced advanced video editing capabilities like gizmo controls and layer masking, delivering a professional-grade editing experience within a browser-based composition engine.
- Introduced advanced video editing capabilities including gizmo controls, layer masking, text shaping, and timeline-based keyframe animation with a professional-grade editing experience within a fully browser-based Remotion composition engine.
- Engineered a grouped QR scanning system that bundles multiple related AR experiences under a single scan.
- Engineered a full-featured AR experience dashboard, enabling intuitive creation and management of image and ground-tracking experiences, thereby streamlining content workflows and enhancing user efficiency.

MANNIT | SDE Intern

Chennai, Tamil nadu, India

ReactJs, TypeScript, LLMs, VectorDB, Flask, Langchain, FastAPI | Feb 2025 -- Jul 2025

- Resolved Pinecone API quota limits by engineering a hybrid FAISS local indexing layer, achieving 3-5x faster similarity search and reducing query latency for critical application functions.
- Resolved Pinecone API quota limits by engineering a hybrid FAISS local indexing layer with in-memory storage, achieving 3--5x faster similarity search and reducing query latency from several seconds down to milliseconds.
- Built PostgreSQL-backed authentication with chat history persistence and an admin dashboard, ensuring secure user access and efficient management of application data.
- Developed an OAuth-authenticated GitHub app to deliver AI-powered code reviews, enhancing code quality and providing architectural explanations for improved development workflows.
- Engineered scalable codebase analysis for 10,000+ file repos via AST parsing, smart filtering, and batched async processing.

Telesto Energy | SDE Intern

Coimbatore, Tamil Nadu, India

Django, SQL, Node.js, PlotlyJS, MySQL, Jira, REST | Feb 2025 -- Jul 2025

- Developed and optimized REST APIs using Node.js to ingest and serve large-scale real-time energy datasets, ensuring low latency for critical application performance.
- Normalized and built robust MySQL schemas, significantly improving query performance and data integrity across energy monitoring pipelines to prevent critical data issues.
- Integrated ML models into the data pipeline to enable predictive analytics on energy consumption patterns; automated model inference on incoming data streams and surfaced actionable insights through interactive PlotlyJS dashboards.
- Built a responsive Django web interface with real-time data visualizations, enabling users to monitor live energy metrics and analyze trends through an intuitive UI.

PROJECTS

Fake News Detection blue Certificate blue Demo

Nov 2024 -- Jan 2025

ReactJs, TailwindCSS, Flask, GitHub, AWS, LLM

- Architected a real-time fact-checking UI, integrating OCR and multimodal AI models to analyze diverse media and detect misinformation with 85% accuracy.
- Extended the detection pipeline to support live and recorded media inputs, enabling automated misinformation flagging across dynamic web content.
- Implemented real-time predictions for immediate feedback, recognized among 5000+ participants at the Truth Tell Hackathon for innovative problem-solving.

Smart Blind Stick Demo

Jul 2024 -- Aug 2024

Python, OpenCV, IoT, Embedded Systems, GPS, Twilio API, ESP32

- Developed an IoT- and AI-assisted smart walking stick to improve obstacle awareness and emergency response for visually impaired users.

- Implemented embedded control logic for ultrasonic obstacle detection and water sensing, providing real-time alerts and on-device system toggling.
- Integrated GPS-based emergency location sharing with Twilio SMS, enabling live coordinate transmission during distress situations for enhanced safety.

EDUCATION

Amrita Vishwa Vidyapeetham
Bachelor of Technology in Computer Science and Engineering | Sep 2021 -- May 2025

Coimbatore, India

ACHIEVEMENTS AND ACTIVITIES

- NASA Space App Challenge (Oct 2024) — Seismic Data from Apollo and Mars InSight Missions
- ANSAN -- GDSC Project (Jan 2024) — Google Solutions Challenge India Regional Bootcamp
- Pragyan '23 -- National Winner (Mar 2023) — National Level Hackathon at NIT Trichy
